

HPUX Installation of the License Server software (MEIs):

There is now one tar archive for MEIs named "MEIs-xxx.tar".

Installation steps:

- Copy the MEIs archive to the HP-UX system into:
 /opt/CoCreate/MEIs/
- Change directory to:
 cd /opt/CoCreate/MEIs
- Unpack the downloaded file in the MEIs installation directory:
 tar -xvf MELSHPUX.tar
- Rename MEIs-xxx-hppa1.1-hpux-11.00 -> MEIs
- Start the installation script:
 ./melsinit -> displays the Usage (setup, show, process,...)
 ./melsinit setup -> startup installation setup for ME License Server

Check:

To check the status and the version of the License Server, open a browser and type the URL:

http://<License Server hostname>:17171/

Directory structure

Following files are stored in the main directory

- MEIs-xxx-hppa1.1-hpux-11.00 License Server code
- MEIs.conf File that contains the passwords for the CoCreate products (MEIs.conf.example).
- melsinit Installation script (accommodate the pathes, edit if needed)
- /doc CoCreate Licensing Help
